PROFESSIONAL SUMMARY

Fresher Computer Science Engineering graduate with skills in React.js, JavaScript, SQL, and Java, along with internship experience in database development and responsive front-end engineering. Built and developed end-to-end applications integrating React.js front ends, Node.js/Java back ends, and SQL databases. Experienced in SQL query optimization and REST API integration, with a focus on developing reliable and user-friendly web applications. Seeking an entry-level Software Development role where I can apply my technical skills, contribute to real-world projects, and grow as a software professional.

TECHNICAL SKILLS

Programming Language: Java
Database: Oracle SQL
Frontend: HTML5, CSS3, JavaScript, React.js
Backend: Node.js, REST API Integration

PROFESSIONAL EXPERIENCE

SQL Developer Intern *Mar 2026 – Aug 2026*
Sri Kumaran Softwares | Tirupur, India

- Maintained and debugged Oracle-based ERP application modules over a 5-month internship, resolving application- and database-level issues to improve system reliability.
- Developed and integrated REST APIs using Node.js and TypeScript, connecting application services with ERP modules and database operations. Debugged application, API, and database-level issues and supported testing and implementation of fixes.

Web Development Intern *Dec 2025 – Jan 2026*
SparkOut Tech Solutions | Coimbatore, India

- Built responsive, cross-browser web interfaces using HTML, CSS, and JavaScript over a 4-week internship, translating design specs into functional front-end code.
- Partnered directly with the development team to implement UI components consistent across browsers and screen sizes.

PROJECTS

Sign-to-Text Translator | React.js, Node.js, SQL, Python (ML)

- Built a full-stack accessibility application converting hand-sign gestures into text in real time, integrating a Python ML model for gesture recognition.
- Developed the front end in React.js and REST API layer in Node.js, using SQL for persistent storage — a complete UI-to-database build.

Leave Management System | Java, React.js, HTML, CSS

- Built a two-role (student/admin) leave management platform enabling students to submit requests and admins to review and approve them.
- Implemented real-time application-status tracking, giving students visibility into approval progress without manual follow-up.
- Developed the full stack: front end in HTML/CSS/React.js, back end in Java.

Pancreas Segmentation Using Deep Learning | Python, U-Net, CT Scan

- Developed a deep learning-based pancreas segmentation system using a U-Net architecture to identify and segment the pancreas region from CT scan images.
- Preprocessed CT scan data and trained the PyTorch U-Net model for accurate medical image segmentation, evaluating performance using Dice Score and Intersection over Union (IoU).
- Worked with real and synthetic CT scan data to improve the robustness of pancreas segmentation for computer-aided medical image analysis.

EDUCATION

Bachelor of Engineering in Computer Science
Jai Shriram Engineering College | 2022 – 2026 (Expected) | CGPA: 8.52
Higher Secondary Certificate (HSC)
Palaniyammal Girls Higher Secondary School | 2021 – 2022 | 79.5%
Secondary School Leaving Certificate (SSLC)
Shri Valli Vidhyalaya Matriculation School | 2019 – 2020 | 91%

CERTIFICATIONS

- Google Cloud Study Jams 2023 – Google Developer Student Clubs
- Gen AI Study Jams 2024 – Google Developer Groups
- Cloud Computing – NPTEL (ELITE + SILVER)

WORKSHOPS & TRAINING

- React.js Workshop (5 Days) – Altalya Solutions
- Web Development Workshop (3 Days) – Altalya Solutions
